ISONAS Recognized for Exponential Growth; Selected to the BizWest Mercury 100 List for Fourth Consecutive Year

Leading Colorado-based access control manufacturer continues to be recognized for its significant growth year after year and once again named as one of Boulder Valley's fastest growing private companies in 2017.

BOULDER, COLO. (PRWEB) JULY 12, 2018

ISONAS Inc., a leading Pure IP™ access control system manufacturer, today announced that it has again made the BizWest's Mercury 100 list as one of the fastest growing companies in Colorado for 2017. Compiled by BizWest's research department, the Mercury 100 competition recognizes the percentage of revenue growth over a two-year period. The fastest-growing private companies in Boulder and Broomfield counties were honored for their continued growth over two years in their respective industries. The 100 companies were divided into 5 "flights" with a total of 20 companies per flight; flights are based on total annual revenue. For the Boulder region, ISONAS was part of Flight 2, which consisted of companies with revenues from 3.7 million to 8 million.

ISONAS is changing the way access control is deployed globally. The network based, intelligent reader-controller devices utilize power over Ethernet; making them easy to install and more cost effective than traditional panel-based solutions. The edge-computing hardware and access control as a service (ACaaS) software are distributed through a large network of certified integrators and committed distributors in the United States and 26 other countries. Over the last 6 years, ISONAS has developed new hardware and software solutions, established strong customer relationships, and experienced dramatic growth that has propelled the company to be the leading Pure IP™ access control provider. The company's leadership in the market, new product releases, and its forward-thinking development of its access control software, Pure Access, have all contributed to its exponential growth and in turn its tenure on the Mercury 100 List for the last 4 years.

ISONAS has been nominated and received numerous awards in Colorado and from the physical security market, starting with the Mercury 100 in 2012 and then in 2013 by Colorado Companies to Watch. The company's revolutionary products and unique go-to-market strategy are only a portion of its success. The corporate culture and leadership have attracted top talent and private equity investment which drove the products and growth forward; resulting in a recent acquisition by Allegion, a leading global security products and solutions provider.

"ISONAS is honored once again to be named to the Mercury 100 for the fourth straight year, a prestigious list in our own backyard," states Melissa Stenger VP, Product Management & Marketing at ISONAS. "We are committed to our employees, products and most importantly our customers. Our success is a result of their hardwork and dedication to our brand and our Pure IP™ solution." In 2018, ISONAS has been delivering new products and integrations with no plans of slowing down in the future.

Since 1999, ISONAS has been revolutionizing access control with one simple solution and is today's leading manufacturer of Pure IP™ Access Control hardware. When paired with their industry leading cloud hosted software solutions or 3rd party full featured access control software, a complete access control platform is formed. An
